

Packaging and accumulation systems

Integrated divider-grouper

FIFO dynamic accumulator

General scope

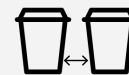

Length < 3m

5 000 à 60 000
products / h

Flexible and adaptable
to customer needs

Soft handling

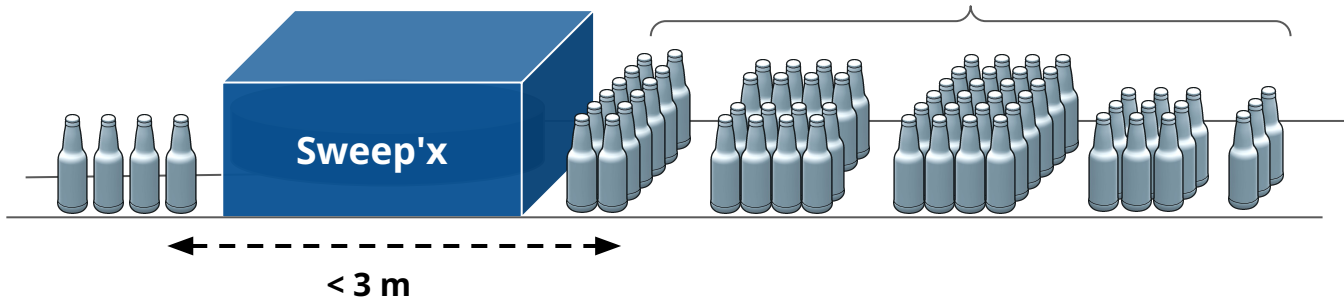

50 - 100 mm

Flexible Integrated divider-grouper

Sweep'x integrates servo driven latest technology providing a great flexibility of batch configurations from 1 up to n output lines.

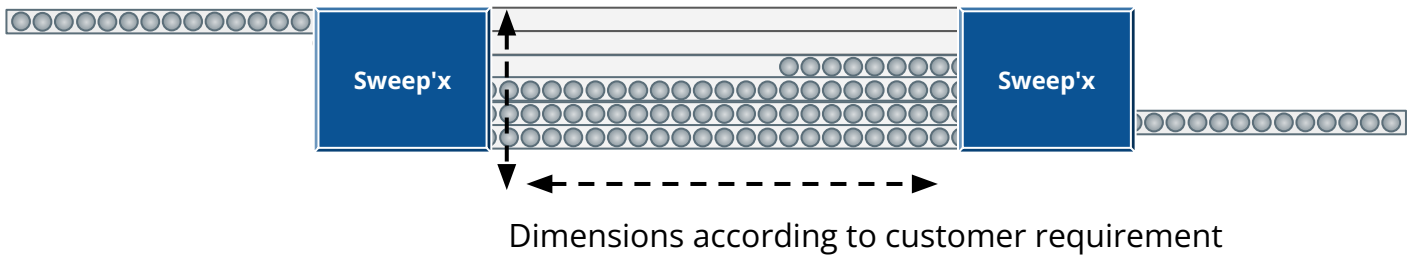

Example of batches

- ✓ Low floor space requirement
- ✓ Collation ideally prepared for downstream equipment
- ✓ Many compatible products
- ✓ Automatic changeover

FIFO dynamic accumulator

Sweep'x provides a FIFO (First in First Out) dynamic accumulation, with soft handling of the product and minimum contact between each other

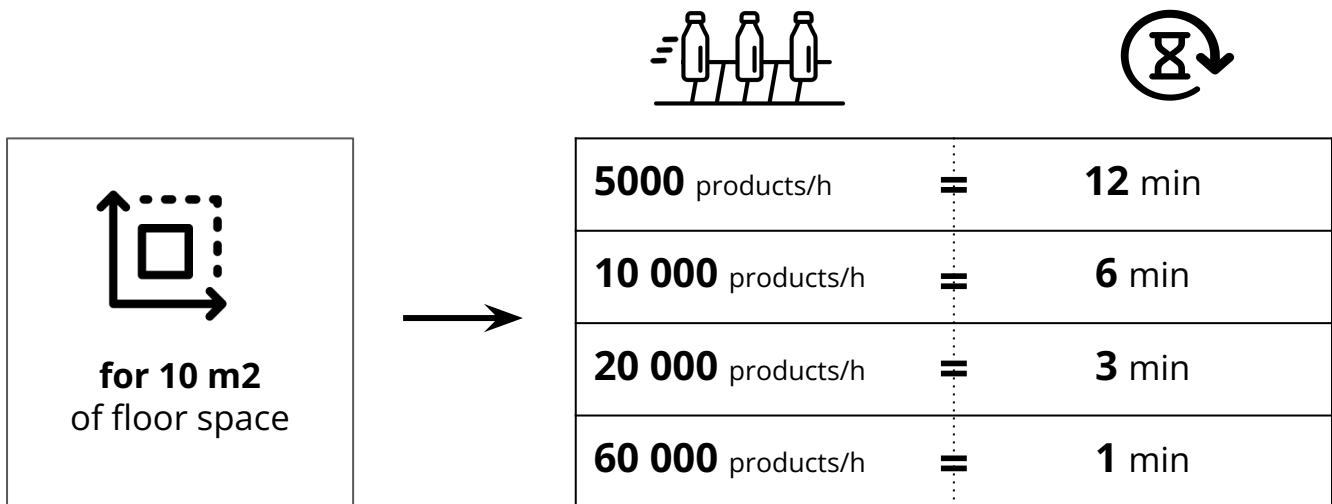

- 

Integrated outfeed divider function
- 

FIFO emptying, allowing product traceability
- 

Dimensions according to customer requirement

Buffering time vs. line speed:

For a 6 lines installation and 60 mm diameter products.

Let Sweep'x open up wider perspectives

- Digitized packaging lines
- Parametrization and remote control
- Data analysis and continuous improvement
